MACRO-ECONOMIC REVIEW

Growth Scenario

Sterling performance of services and manufacturing sectors helped the Indian economy to register growth of 9.4 per cent in 2006-07, as compared to a rise of 9.0 per cent during 2005-06, the highest increase in 18 years, despite slowdown toward the close of the year (Table 2). The better performance during the year under review was largely contributed by the manufacturing, services, mining and quarrying sectors. The other important developments in the economy has been the increase in domestic saving rate and capital formation which facilitated the diversified growth in the economy. It has been projected that GDP growth may be around 10 per cent during 2007-08.

Trends in Equity Market

Primary Market

Resources raised through the public issues increased by 20.2 per cent to Rs.32,382 crore during 2006-07 as compared to Rs. 26940 crore year 2005-06 (Table 3). The average size of issues increased to Rs.272 crore from Rs.195 crore during the corresponding period of the previous year reflecting the entry of large companies in the market. All issues, except one, during 2006-07 were by non-Government public limited companies (private sector) and mostly by non-financial companies.

Mobilisation of resources through private placement increased by 50.8 per cent to Rs.1,03,169 crore during April-December 2006 over the corresponding period of the previous year. This was mainly on account of a nearly
